Third-Year Software Engineering Student, Addis Ababa Science and Technology University (AASTU)

Professional Summary

Third-year Software Engineering student with a solid foundation in C++ programming and growing web development skills. Eager to build practical projects and gain hands-on experience in software development. Seeking an internship or junior developer role to apply classroom knowledge to real projects and keep growing as an engineer.

Education

BSc in Software Engineering (2024 – Present)

Addis Ababa Science and Technology University (AASTU)

- Relevant Coursework: Fundamentals of Programming (C++), Object-Oriented Programming, Database Systems, Data Communication and Computer Networks

Technical Skills

- Programming Languages: C++
- Web Development: Basic HTML and CSS (currently building skills)
- Tools & Version Control: VS Code, Dev-C++, Git, GitHub

Projects

Simple Banking System (C++, Dev-C++, Git/GitHub)

- Built a console-based banking application with account creation, balance checking, deposits, and withdrawal validation.
- Used control loops and conditional statements to handle menu choices and prevent invalid transactions.
- Managed source code and version history using Git and GitHub.

Personal Academic Portfolio (HTML5, Git/GitHub)

- Designed and built a multi-page web portfolio using semantic HTML to showcase academic coursework and projects.
- Structured data tables and navigation links to organize university records and code repositories.

Course Guidance Project (C++, Dev-C++)

- Developed a console application that helps students navigate course options, prerequisites, and credit hour requirements.
- Used custom data structures (struct) to manage academic information.

Languages

- Amharic: Native
- English: Professional Working Proficiency
